

01 | Project Context

Project: Senegal Permaculture Oasis
Coordinates: 14.458700, -16.012600

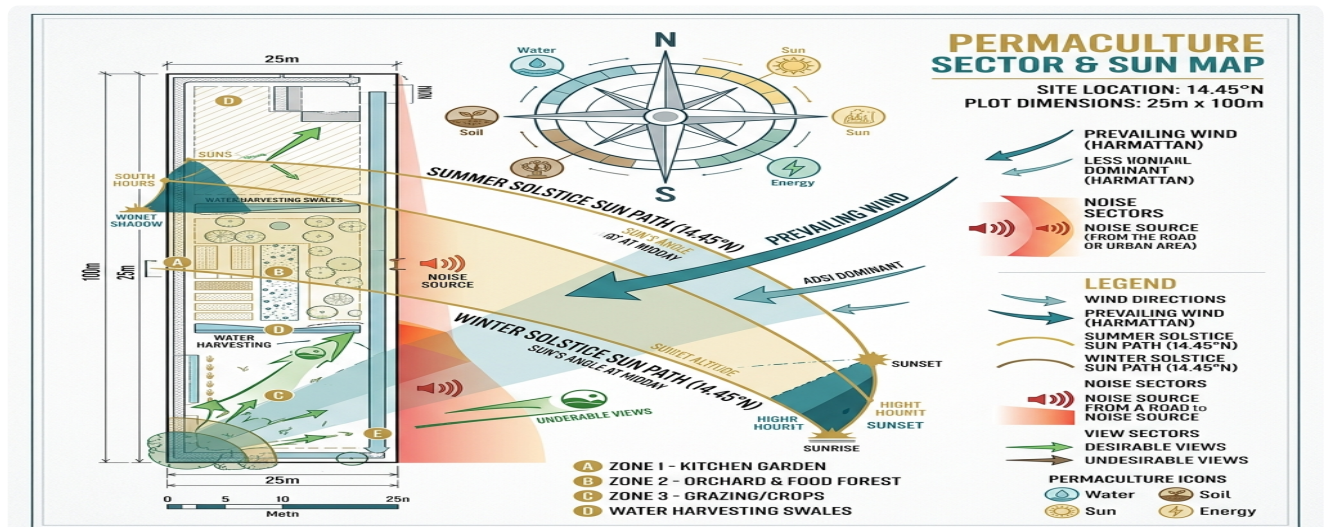

02 | LiDAR Topographic Analysis

The site reveals a subtle 1.2% slope towards the West. This drainage pattern is critical for our swale placement.

03 | Sun & Sector Compass

Peak solar harvest at 15° South. Windbreaks required for NE Harmattan winds.

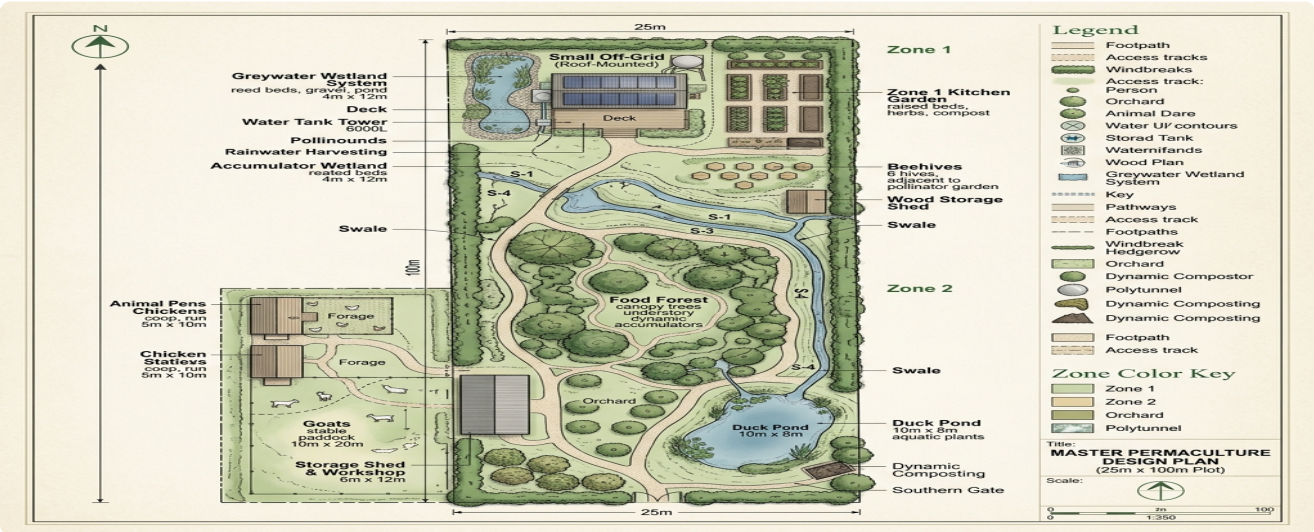

04 | Water & Irrigation Swarm

Integrated system: Ollas for Zone 1, Swales for Zone 2/3, and 20,000L rain storage tower.

Experimental fog nets proposed for the back 100m zone.

05 | Infrastructure & Livestock

Integration of Chickens, Goats, and Bees. Black/Greywater recycled via mulch basins.

06 | Financial Projections (ROI)

Category	CAPEX	ROI	
Solar/Borehole		\$4,500	Critical
Orchard		\$1,200	4-6 Years
Vegetables		\$500	< 1 Year
